

History and Geography Knowledge Organiser – Year 1 and 2 – Local Study - Farming

Scotland's most popular type of farming is livestock farming of sheep and cows.

Farming in Northern Ireland is mainly grass-based livestock farming.

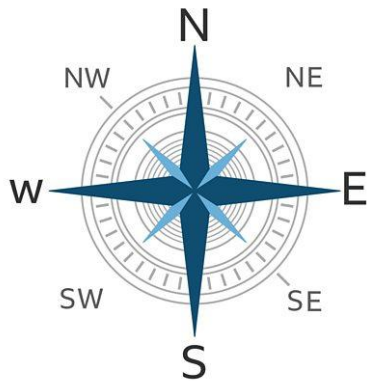

Farming in Cambridgeshire is mostly crop farming of wheat, sugar and potatoes.

Wales' most popular type of farming is sheep and cattle rearing.

Compare aerial images of the same location over a period of time to compare similarities and differences.

Pupils will be able to ask questions about how farming has changed over time and know that people can be a source of historical information. Pupils will also be able to compare pictures of farming and organize them into now and then and discuss similarities and differences between them.

Pupils will know how to read a compass and the directions that it points to.

Key vocabulary	Definition
agriculture	Agriculture is the science of farming, it includes the cultivation of soil for growing crops, rearing animals to provide food, wool and other products, and harvesting grown crops as effectively as possible.
livestock	These are farm animals who are raised to generate a profit.
