

E-safety mission statement:

At Brington Church of England Primary School, we work with staff, pupils, and parents/carers to create a safe and responsible school community where technology is used to enhance learning. We promote the responsible use of ICT and follow agreed policies to minimise potential e-safety risks.

Our e-safety policy is regularly reviewed and linked with other relevant policies, including Safeguarding and Behaviour. We support staff in using technology effectively and embedding e-safety across the curriculum.

We ensure all pupils understand the potential risks of using digital and mobile technologies, know how to stay safe online, and feel confident to report any concerns.

We provide opportunities for parents and carers to learn about e-safety, sending out information and guidance to support them in helping their children develop safe and responsible online habits.

This statement will be reviewed __March 2026_____
