Parent Guide to Google Classroom

Remote Learning at Brington C of E Primary School

What is Google Classroom?

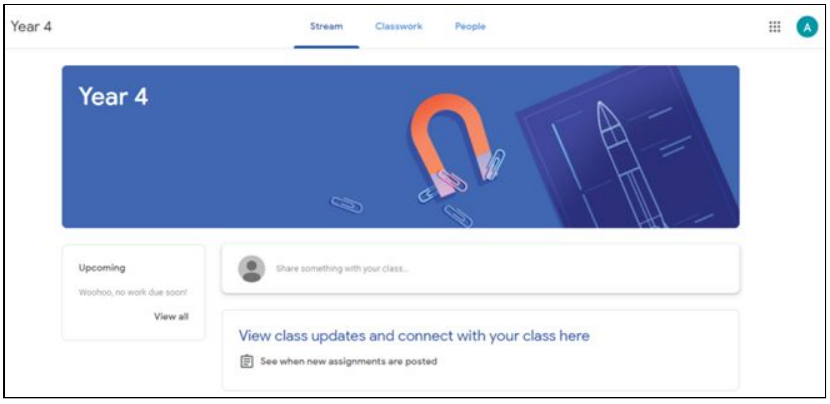

Google Classroom is a resource to assist our families and children when working remotely at home. Teachers can use Google Classroom to send announcements to entire classes, share resources, provide instructional videos, set tasks and post homework. Pupils can use it to access specific work set by their teacher and any other whole school resources and projects. Parents can use some of the features of Google Classroom to help engage with and support pupils in their learning at home. It is a free resource that can be accessed from any device connected to the internet - laptops, desktop computers, chromebooks, tablets or mobile phones.

Accessing Google Classroom

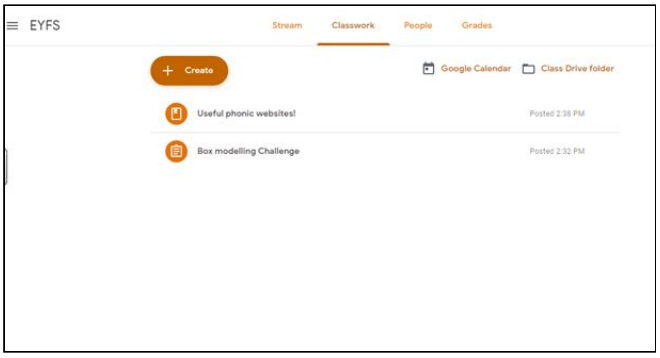

Pupils can access Google Classroom using the mobile apps (Android and iOS), or via a web browser by visiting http://classroom.google.com
You should sign in using the username and password provided for your child from school.

Once pupils have logged in, they will see the class overview page. From here they can see a summary of all 'classes' they are registered with and a summary of any tasks set. Clicking on a class will open that Classroom.

The classroom overview page will show any class announcements, tasks or posts made by the teachers. The three main views available are:

Stream shows a list of posts made to the class by teachers. This includes announcements, questions and activities.

Classwork allows users to see the folders of work the teacher has set.

People gives an overview of adults and classes registered. The email facility is *not* activated for your child's account.

Over the next few weeks we will continue to develop our use of Google Classroom - stay tuned!
You can find out more about Google Classroom at https://support.google.com/edu/classroom/

If you have any further questions about Google Classroom or require technical support, please contact the school office.
